

USB to RS485/422 Mini - Premium  
Part no. XS885

This surge and static protected USB to RS485/422 converter is a port powered small and convenient converter with no need for external power supply and with operating temperatures from -40 to +85 degree Celsius.

Electrically protected against static electricity, high voltage spikes and other dangerous voltage spikes which can damage your equipment or data signaling. This protection is accomplished by four TVS's (Transient Voltage Suppressors), one for each data line.

This converter is made with the high performance and very reliable FT232RL chip from FTDI and is suitable for most applications, including industrial, commercial and any general office computer and device.
